Harrow, London

Right to Work: UK, no sponsorship required

Profile

I've run the day-to-day trading on a live Shopify store for nearly four years, keeping a 500+ item catalogue accurate and priced sensibly through every promotion and seasonal event. I check competitors and market trends as I go, and what I find feeds straight into pricing, copy and campaigns.

I write the copy, build the email campaigns and manage the site content myself, so I know the whole trading cycle. What I want next is the same kind of work inside a bigger team, alongside buying, supply chain, marketing and IT.

Roles I'm looking for: E-commerce Executive, Online Trading Executive, E-commerce Merchandiser, Digital Marketing Executive.

See my [portfolio](#) for my results, work history and contact details.

What I've achieved in my current role

Raised online conversion by roughly 10%

Measured by Shopify analytics, compared month to month

How Adjusting prices and promotion placement using the competitor and market research I do on an ongoing basis

Grew email revenue by around 14%

Measured by Revenue attributed to email in Klaviyo

How Segmenting the audience, setting up automated flows, and checking every send for wrong links, prices and offers

Increased organic visits to product and category pages by about 11%

Measured by Organic sessions in Google Analytics

How Rewriting product and category copy and applying on-page and technical SEO

Cut stock and price mismatches on the site by around 13%

Measured by Catalogue audits across the 500+ products

How Checking stock and pricing every day and coordinating updates with the rest of the business

Figures are approximate.

What I do

Online trading and merchandising

Product listings, pricing and variants, inventory, catalogue audits and data accuracy. Merchandising and promotional placement planned around the trading calendar for seasonal campaigns.

Commercial and market analysis

Ongoing competitor and market monitoring, with input into pricing and positioning, plus category-level reviews of the catalogue.

Content and digital marketing

Product and category copy in the brand's voice, email campaigns with segmentation and automated flows, social and promotional content, and on-page and technical SEO. Tools: Klaviyo, Mailchimp, Canva.

Working with technical teams

A computer engineering background and hands-on site builds let me talk to developers and IT directly. I'm used to coordinating stock and pricing updates across a business. Tools: Figma, Adobe XD, Photoshop, Illustrator.

Platforms: Shopify (advanced), WooCommerce and WordPress (working knowledge). Also comfortable in Microsoft Office and Google Workspace.

Experience

Digital Marketing & E-Commerce Coordinator

Oct 2022 – Jul 2026

TVA Technology Limited, Welwyn Garden City (3 years 9 months)

Trading and merchandising

- Uploaded and maintained 500+ products on Shopify: descriptions, images, pricing, sizing and variants, tags and inventory.
- Merchandised collections, listings and promotional placements against the trading calendar for seasonal launches and campaigns.
- Checked stock and pricing daily and coordinated updates across the business so availability and prices stayed aligned.

Analysis and SEO

- Researched competitors and the market on an ongoing basis, and used the findings in pricing, positioning and content decisions.
- Applied on-page and technical SEO to product and category content to support organic visibility and site performance.

Content, email and social

- Wrote and edited product descriptions, category content and website copy in the brand's voice, ready to go live without a rework cycle.
- Built, scheduled and tested Klaviyo and Mailchimp campaigns, including segmentation, automated flows and pre-send checks on links, pricing and offers.
- Wrote email, social and promotional copy and made assets in Canva for each launch and campaign.

Working across teams

- Used an engineering background and website-build experience to speak the same language as IT when site issues came up.
- Learned Shopify's back office and each marketing platform on the job, with no formal training.

Project

Arts, Commerce and Science College Khambhat

Oct – Dec 2020

Official college web portal, acsckhambhat.com

Built the college's web portal with a mobile-first, responsive design and a structured content architecture.
